Modeled after our popular BioMixer series of "nutating" shakers, these platform rockers provide the perfect 3-dimensional motion for all blot related applications. Their tilt angle and speed have been optimally set for gentle, but thorough mixing in gel trays, boxes and other flat vessels.

Mini BlotBoy and **BlotBoy** come standard with autoclavable flat mats and are ideal for blot washes and gel staining/destaining. Both models have been designed to conserve bench space. The **Mini BlotBoy** is supplied with a 10.5 x 7.5 inch platform while the larger **BlotBoy**'s 12 x 12 inch platform expands the useable work surface by 80%.

The **Mini BlotBoy** and **BlotBoy** can accept stackable platforms and handle loads up to 2kg. Both have maintenance free brushless motors and are safe for use in cold rooms and incubators.
